## DETAILED ACTION

### *Response to Amendment*

1. This action is responsive to the Amendment filed on May 23, 2006. Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn.

### *Claim Rejections - 35 USC § 101*

2. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1-21 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

Regarding claims 1, 16, and 21, the claimed system/ method that load tests a server provides no physical transformation, nor is any useful, concrete, and tangible result produced.

Similarly, claim 10 recites a system that stresses a server, but provides no physical transformation, nor produces any useful, concrete, and tangible result produced by the claimed invention.

Claims 2-9 and 17-20, which are dependent upon claim 1 and 16; and claims 11-16 which are dependent upon claim 10 are also rejected.

***Conclusion***
